Notes:

Following this plan will allow you to complete your B.S.B.A. degree in general business and the required minor in business in four years (eight semesters), assuming you meet performance expectations in all courses. You should give careful attention to course prerequisites, as they are strictly enforced. If you choose to earn your degree over a period longer than four years, the basic sequence of courses shown above will still apply in most cases. If you decide to deviate from the recommended sequence, you should consult with the College of Business advising center for assistance in developing an alternative plan.

The major in general business can be completed at night.

Students desiring to enter the B.S.B.A. degree program in general business must meet selective admission requirements for the Haile/US Bank College of Business, leading to certification in the major. Prior to certification, students are enrolled as "pre-majors." Some of the selective admissions courses can be used to satisfy university general education requirements and some satisfy partial requirements for the minor in business. The selective admission requirements are met by completing the ten-course group with a minimum grade of *C*- in each course, and a minimum GPA of 2.50 across the group.
