#### Notes:

Following this plan will allow you to complete your B.S. degree in economics with a minor of your choice in four years (eight semesters), assuming you meet performance expectations in all courses. You should give careful attention to course prerequisites, as they are strictly enforced. If you choose to earn your degree over a period longer than four years, the basic sequence of courses shown above will still apply in most cases. If you decide to deviate from the recommended sequence, you should consult with the College of Business advising center for assistance in developing an alternative plan.
